WALLS UNIVERSITY
College of Informatics
Department of Computer Science

Course Title: Fundamentals of programming II
Course code: 1013
Credit hour: 3hrs
Instructor Name: Khaled H. ...
Office: Informatics College 1st floor e-mail: khrom.kh2@gmail.com

Targeted group: 1st year computer science student

Course Objectives: At the end of this course students should be able to:

- Analyze variety of problems and generate appropriate
- Explore the syntax and usage of the high-level programming language as a means of accomplishing the first objective
- Examine the software development environment and associated tools

Course Description: This course is a continuation of Fundamentals of Programming I, modular programming and abstract data types, which covers user defined data types, pointers, string processing, Functions and parameter passing, including recursion, file input/output, principles of modeling abstraction and decomposition, program design and evaluation (modular coupling and module strength).

Course Outline:

I. Chapter 1: Overview of fundamental programming

1.1 Introduction to C++ Programming

1.1.1 Introduction
 1.1.2 Primitive Data types
 1.1.3 User Defined types
 1.1.4 Operators & Operator precedence
 1.1.5 Data Type Conversion
 1.2 Selection Statement
 1.2.1 Selection Statement
 1.2.2 Multiplex Statement
 1.2.3 Repetition Statement
 1.2.4 Breaking Control Statements

Auditing PDF Auditing PDF Auditing Syllabus Download Auditing Questions and answers Download Auditing Notes Auditing is a systematic and scientific examination of the books of accounts and business records to allow the auditor to satisfy himself that the profits and loss account and the budget are adequately elaborate in order to show a real and correct vision of the financial state of the business and the loss of profit or profit for the loss of the budget. Auditing questions and answers if you have already studied the notes of auditing and services, then it's time to move forward and pass through the previous year auditing and services documents questions. Give two audit limitations. What is an audit program? Give the meaning of test control. What is the meaning inside? What are you guaranteeing? Explain the baseBetween provision and reserves what is the main purpose of preparing the trading account? What are the types of criminal passivities? Call them. What are the divisible profits? What is meant by investigation of the accounts? What does he understand from a partnership action? What does it mean dividing unpaid or not claimed? What do you understand on the lost account? Explain the provision regarding the distribution of dividend out of the lost account. What special points are mentioned in the report prepared by the investigator? What factors should they be mentioned in the Audit report according to section 227 of the Indian Companies Act. What points should they be considered by an auditor while control over cash and materials in the trial audit of governmental societies? What is an audit program? How should it be built? Give the essentials of a good Audit program. Briefly describe the provision of ACT companies regarding the appointment of an auditor. Revision application document if you have already studied the notes of auditing and services, then it's time to move forward and pass through the previous year auditing and paper demand services. You help you understand the application paper model and the type of application for revision and answer asked in B.com, BBA 3 A A A A A A A A A A A A . It is possible to download the Syllabus in the PDF form auditing. Below is the list of Audit books recommended by the best university in India. L. N. Chopde, D.h Choudhari, Dr. Baban Taywade.
